

# 8 Tips for Choosing A Cloud Based Restaurant / Cafe POS System

Astute businesses are switching to a superior way of acquiring Point Of Sale systems. Software as a Service (SaaS) combined with commodity hardware or industrial grade if required.

## As a Minimum the System Must:

1. Be %100 Available. If the Internet goes down, the system must continue to operate.
2. Cope with peak load demands.
3. Provide a Private and Secure Account to protect your data.
4. Require No On-Site Software to eliminate problems such as Upgrades, Viruses, Backups, Licenses, Device Drivers, and Maintenance Issues.
5. Provide a Full Feature Set including Inventory Management, Customer Loyalty, Privilege Levels, Reporting etc.
6. Print / Open Cash Draws without time delays.
7. Work on Any Device. Android, Apple and Windows.
8. Work with Other Cloud Services such as new payment platforms from Tyro and CommBank's Pi / Albert, as well as on-line Accounting, PMS and other services.

While traditional POS systems usually charge per register, new cloud based POS system; SplitAbility POS has a different approach. By allowing customers an Unlimited Number of Devices, businesses benefit during high demand periods.

SplitAbility ticks every one of the boxes above and is quickly emerging as the number one choice for Restaurants and Cafes who are serious about controlling costs and improving customer satisfaction. SplitAbility offers a FREE consultation, set up and migration service.
